Comments: I support the Granite Goose Landscape Restoration Project.

In particular, I am in favor of a new bridge being constructed on the upper end of NFS trail 353 (Goose Creek trail) and of the closing of roads 50056, 50839, 50052 and 50841 within Bear Basin to public motorized use. I also support the adoption of the user created trail that parallels NFS road 839 in Bear Basin.

As far as expanding parking for Bear Basin on NFS Road 50052 I would suggest that we rework the parking at West Face lot instead. In the summer months, I recreate from this lot at various times of day and have never seen it at full capacity. If West Face lot was closed to dispersed camping it would allow for more parking throughout all seasons as campers and RVs would no longer occupy large areas in the lot.

Thank you for assembling such a comprehensive project.
