Comments: I'm writing you today to let you know I adamantly oppose the proposed logging of Telephone gap. I am a local science teacher and I love teaching our students about the biodiversity of our local forests. A logging operation is not what our landscape needs. We need to strengthen the conservation and preservation of these forests. The forests act as a buffer to many important  in turn will help safeguard us against floods, and the impacts of a changing climate. Telephone gap must be protected.
