Comments: Vermont's incredible natural environment is one of the reasons I chose to go to college in Vermont, and to hear of the logging plans in the Telephone Gap area is tragic. The area contains old growth forests which not only store carbon that we need to keep out of our atmosphere, but also help make floods more manageable and are crucial to providing a habitat for many endangered species. I deeply hope the US Forest Service will consider the irreversible damage that it might do in logging such a area, and make the choice NOT to go forward with the logging plans.
