Last name: Corcoran

Organization:

Title:

Comments: I urge the US Forest Service to remember who you serve - the people and the forest. Do the right thing for our children and great grandchildren and cancel the logging of Telephone Gap. Let the forest do what it was created to do: breathe in carbon dioxide, breathe out oxygen, sequester carbon, provide clean water and habitat for countless forms of life. Trees are the skin of the Earth and we need them in ways we still don't understand because we are SO focused on our short-term wants. We need to learn how to live lighter on the land that support us and all life.

Thank you.

Sincerely,

Jonathan Corcoran
