Comments: I am writing to express:

Support for the multi-use trail system being planned and proposed at Jackson Mountain outside Pagosa Springs, Colorado on National Forest Service lands, and

Support for the proposed gravel/aggregate pit

The site is by no means a 'pristine wilderness'. We need aggregate, places to ride bikes are also great. We can put our headphones on and ignore mining equipment. The trails really should be multi-use (motorcycles) anyways. This ain't a beautiful mountaintop. Lets all have fun, build trails, share the public land, and be friends. And have more affordable concrete.
