Comments: The Green Mountain National Forest's Telephone Gap Integrated Resource Project, a 12,000-acre logging job targeting vast, healthy forests up to 160 years of age, is unwise, against scientific consensus and morally unconscionable.

Further, the project blatantly ignores President Biden's Executive Order demanding protections for these mature and old forests, as well the recent addition of the Northern Long-eared Bat to the federal endangered species list.

This timber sale is a menace of national proportions to our climate and biodiversity and must not be allowed to go forward.
