Title:

Comments: Mark and Susan Ney here, land and cabin owners in the Alpine Community. The proposed roadside camping along county roads 162 and 292, two very narrow roads with impeded sight lines is dangerous in and of itself. Adding waste management, camp fires, non-permitted hunting and fishing and campers wandering on private property are just a few other issues concerning us. Are county law enforcement, first responders, fire personnel, forest service rangers, game and fish rangers, etc going to be able to cover these campers needs or violations. And what will happen to these campers when the spring and summer flash floods and mudslides come? The worries and questions are endless. We know the challenges this beautiful valley presents. We are up to those challenges. Try not to throw too many more at us all at once. Thank you for your time. Susan Ney
