Dear Project Leader Lisa Bousfield

As a resident of Redding, CA I am writing to voice concerns over the Antelope Tennant Recovery Project. I have concerns about the request that this project be filed using an Emergency Situation Determination since the fires occurred in 2021. I spent a weekend in Mt. Shasta during the Tenant Fire and the smoke was terrible. The people that use our national forests should be allowed more opportunity to comment on the plan and that the best projects occur when all stakeholders are given ample opportunity to review proposals. I am also concerned with the planned salvage logging scope and scale. Lastly, I believe a broader protection area should be included around the Medicine Lake Highland Traditional Cultural Property.

Thank you, John Livingston, member Sierra Club
