Dear Project Leader Lisa Bousfield,

Dear Project Leader Bousfield & Supervisor Smith

The merit of Medicine Lake Highlands are self evident.

Post-fire "salvage" logging harms & delays recovery. I respectfully urge Klamath National Forest to avoid ground-based post-fire logging & new roads.

The life that remains post-fire is exponentially critical for surviving plants & animals.

Since many are concerned corruption is trumping science here in particular & a lot of places in general.

Please re-open the public comment period when the surveys, specialist reports & analysis are completed, so that I and others can provide more informed input on the project.

Profit should never flow from fires on our public land. Remove the incentives.

Sincerely, John Rogerson

Sincerely,

John Rogerson
