Dear Project Leader Lisa Bousfield,

I am writing to voice concerns over the Antelope Tennant Recovery Project.

I have concerns about the request that this project be filed using an Emergency Situation Determination since the fires occurred in 2021. I believe that the public should be allowed more opportunity to comment on the plan and that the best projects occur when all stakeholders are given ample opportunity to review proposals.

For example, I am concerned that the proposal contains new roads even though there are many existing roads.

I also have issue with allowing cattle grazing before the native flora has a chance to become established.

Lastly, I believe a broader protection area should be included around the Medicine Lake Highland Traditional Cultural Property.

Thank you,

Sonia (Sunny) Fletcher Dinger
