Comments: -Public forests are invaluable assets to be experienced and enjoyed by we citizens, our children and future generations. They must be protected.

- mature & old growth forests especially! 92% of areas currently proposed for this logging are classified as such.

- Biden's executive order to protect old growth forests is obviously not being respected since this proposal is being put forward.

- PLEASE withdraw this proposal to log near 12,000 acres. The negative impact will be large. Will takes generations to replace; impacting headwaters for Otter Creek and related plant and animal habitat.

- Very Bad idea and does not take into account the public good.

Thank you for taking public comment. Please withdraw this proposal to log 12000 acres old growth forest.
