Comments:

In regard to the Telephone Gap Integrated Resource Project # 60192 in the Green Mountain National Forest in central Vermont, please get with the wise and necessary social and political callings of current times. That is, minimize road construction and logging operations. Leave just as much as possible unmolested wilderness. The creation and preservation of even islands of undisturbed habitat is of paramount importance. Our planet is only so big. Please, again, catch up with times and votes of citizens.
