Comments: As an outdoor enthusiast, I support Telephone Gap Integrated Resource Project and thank the Green Mountain National Forest for promoting healthy forests and diverse habitat conditions for birds and wildlife. The forest management recommendations proposed in the Telephone Gap Integrated Resource Plan are aligned and consistent with the forest-wide goals and objectives of the 2006 Green Mountain National Forest Plan. I am especially concerned with the species of concern that need young forest. The young forest element needs priority in regards to the "diverse habitat" conditions noted above.
