Comments:

I appreciate the opportunity to comment on the proposal. I am focusing on the area that encompasses the bear basin. I agree to allow more development of summer trails in and around the above mentioned area. As our population continues to grow we need to expand our existing trail system which provides great recreational opportunities for residents and tourist alike. For winter, I completely agree to close everything to the west of the 451 road to motorized use. As ski teacher in Nordic ski area I see the conflict of skiers who pay for their ski pass and uneducated snowmobilers who run onto groomed trails and I hope the area closure to motorized vehicles will solve that problem. I look forward to see how this overall proposal takes shape over the coming years.
