Comments: Please take a stand against he U.S. Forest Service's proposal to log an area larger than the city of Burlington across the quiet, undeveloped and mature forests stretching for 15 miles between Brandon and Killington where there are healthy forests - old growth up to 160 years-old at the headwaters of the White River and Otter Creek. This forest habitat contains endangered species, critical biodiversity and absorbs vast quantities of carbon!

This area needs to be preserved, not logged! Please take a stand to preserve this important habitat for future generations that will benefit from the preserved forest.
