Comments: My family and I oppose the proposal for more dispersed camping off CR162 and 292. We feel it will only make our community more unsafe in regards to fire hazards, and also a hazard to the wildlife that we cherish in our community. We feel there is already enough areas of camping for visitors and any more would be unnecessary, and not of benefit to the people and animals that live and visit in the areas. Thank you for your consideration and awareness of the potential hazards, annoyances, and inconveniences this could create!
