Comments: I am writing to express my opposition to the Forest Service Telephone Gap project. There's already been too much old growth removed from Vermont's forests. I realize we can't do anything about logging on private land, so we have to rely on the Forest Service to protect old growth in our public forests. The future of our climate relies heavily on what we do now. We cannot afford to lose any more old growth. While the trees of Telephone Gap may not all be old growth, they will never be old growth if they are cut down. Thank you.
