Comments: Why is this plan based off of a 2006 forestry plan?

I object to the proposal.

Why take down old mature trees? Can we sustainably harvest younger trees to gather the timber we need?

Does this proposal comply with the Presidents 2022 Executive Order to protect mature and old forests

I am very concerned about the negative impact this will have on our warming climate.

Are you working with any community groups such as [savepublicforests.org](https://www.savepublicforests.org) to develop climate-smart alternatives?
