Comments: I am a frequent visitor to VT for skiing, hiking, vacationing and visiting family. I also am very interested and concerned about climate change and doing what we can to protect our future. This planned use of old an old growth forest is exactly what we need to stop doing. We can no longer say we don't know the harm it causes long term to our health and well being. Short term financial gain will be more than offset by the damage from increasingly strong storms that wash out the roads and more.
