Comments: Let's step back a minute and think about this. Climate change, global warming. There really is no more compelling way to save our planet for our children and their children than to retain old-growth forests.

This is easy, without spending millions restructuring or replacing our energy grid or transportation system. Just keep what we have. This may be our last chance.

We are horrified when we hear about the rainforest being cut down, and yet, here in Vermont, we are considering doing the same. This is not why I live in Vermont!
