Comments: I am writing to express my objections to what I understand is a logging program based on an old and out-of-date plan. Certainly, any logging approved by the Forest Service in a National Forest, must adhere to the the most recent methods and standards. Any other approach would seem to me to be unthinkable .

I trust that you will ensure that any further approvals to conduct logging activities are based on plans that are, at the very least consistent with Biden's 2022 executive order to protect mature and old forests.
