Comments: I wish to voice my objection to the proposed cutting of the old forest in Telephone Gap. Once cut, they cannot be replaced in our lifetime and the harmful results to the climate would be irreparable. Decisions to move forward with this logging is based on a study done almost 20 years ago and much has to come to light in the ensuing years by scientific studies. It would be criminal to move ahead in the face of what is now known. Please stop and think, because moving ahead without doing so would have devastating consequences for us all.
