Comments: Thank you for the public zoom meeting, Tuesday March 7, very informative. I submitted questions concerning Chalk Creek Canyon. Lisa spoke to the Urban order, Federal Regulation 261.50 that enforces no dispersed camping/camping for CR162 & 292, camping in camp grounds only. This order needs to be updated every year. So to that will the maps proposing dispersed camping be updated to remove CR162 & 292?

Many comments have been submitted from our property owners in Alpine and you encouraged public input, so you may see some of the same comments from me.

CR162 & 292 enfringe on private property.

These 2 roads are the only way in and way out for property owners, visitors and emergency equipment.

We value our property values, we came to this Canyon for a reason, as well as visitors for the beauty, wildlife & outdoor experience, there shouldn't be more encouragement to destroy this area, i.e.noise, trash, pollution.

For years we've heard from both USFS & CO State FS that Chalk Creek Canyon is number 1 concern in Chaffee County for fire danger, we do hope this continues.

Dispersed camping can cause more danger for illegal and unattended campfires, causing forest fires.

We all lose the beauty, wildlife and property. Puts more stress on Forest Service & local agencies i.e. fire department and sheriff department.

Thank you for listening.
