Title:

Comments: I am writing to express my concerns about the logging of Telephone Gap in the Green Mountain National Forest. Telephone Gap is a vast, healthy forests up to 160 years of age. The proposed project blatantly ignores President Biden's Executive Order demanding protections for these mature and old forests, as well the recent addition of the Northern Long-eared Bat to the federal endangered species list. This timber sale is a menace of national proportions to our climate and biodiversity. Knowing this, I can't understand why the Forest Service would even consider this logging site or others like it. I urge you not to log Telephone Gap and to consider the systemic health of our ecosystem.

Sincerely,

Debra Stoleroff

Plainfield, Vermont
