Last name: Grace

Organization:

Title:

Comments: Please STOP the destruction of our forests now!!! Trees are the lungs of the Earth. Do you realize if you allow this action to move forward, you will assist in rapidly moving us into the sixth extinction event where much of life and the richness of diversity on this beautiful planet will be lost forever. Think about your children and children's children. What will you say when they asked what happened to the birds and trees and why didn't you do anything to stop this from happening. Too much greed everywhere!! We need to relearn how to live in harmony with all life on Earth and our Mother Earth who so generously gives us life despite our destructive ways. Thank you for listening, may your hearts be open. Jennifer
