Comments: Stop cutting public forests in Vermont! Public forests are needed for the PUBLIC to enjoy. If the USDA and the Forest Service is truly "Caring For the Land and Serving People" as your motto states, then don't touch them! Don't cut them down. Cut forests are no longer forests. With American ingenuity and creativity there are other, better ways to meet our needs. Besides, considering the danger to our precious planet (our only home) of global warming won't cutting forests just add to the problem?
