Title:

Comments: The land included in the Telephone Gap project is a precious resource that we all have the responsibility to protect . We are at a crossroads; how do we wish to be the stewards of the land our children and grandchildren will inherit? We can choose to go forward with the extremely shortsighted plan to clear-cut, or we can preserve it as the treasure it is. Do we truly want to REDUCE our air quality, flooding protection, recreational opportunities and wildlife habitat?

Keep the green in the Green Mountain State!
