First name: Margaret

Last name: Jones

Organization: legacy Forest Trust

Title: Trustee

Comments: If nothing else moves you to do the right thing.....think about your children and theirs.....who will or will not inherit a livable planet.

Racing to cut old and mature growth trees before or in lieu of your completion of the ordered inventory points out the darker side of human nature.

Your continued misuse of Environmental Assessments(EA) and Categorical Exclusions(CE) in place of full scale Environmental Impact Statements(EIS) makes a mockery of our laws and regulations.

President Biden's Executive order calling for the inventory, definition and possible preservation of old and mature trees was a very weak response to the desperate plea from the world scientists for a moratorium on logging these trees.....our best and cheapest mitigation action against climate change.

Please stop the Telephone Gap project.

Why not be a climate hero instead of a villain.
