Title:

Comments: To the USFS,

You are proposing the cutting of 12,000 acres in the Green Mountain National Forest in Vermont. This is public forest, "owned" by all of us regardless of where we live in the United States!

As well, the territory is on the unceded land of the Nulhegan Abenaki indigenous people.

It is within our rights to ask you to stop the logging!

We need our forests to help fight climate change!

This is of extreme urgency!!!! Earth is warming at an unprecedented rate!

Science tells us we have NINE years left to make changes before it is too late!!

So please respect the science and leave our forests alone!

Letitia Scordino - Manchester
