Comments: I oppose the Telephone Gap Integrated Resource Project # 60192. As a professional, certified public sector land planner with over 30 years experience in development oversight ,watershed planning and land protection, I take strong exception to USFS's "management" of citizen-owned resources, which are a public trust! USFS must stop destroying carbon storing mature trees in adherence to outdated "management " approaches, which treat our National Forests as tree farms! The voting public is sick of this abuse of these national treasures, which provide climate attenuation and ecosystem services at no cost to taxpayers! If litigation is necessary to stop this willful ignorance on the part of federal officials who know better, so be it! Do not, repeat, do not implement this project USFS! Begin protecting, instead of destroying, these precious and irreplaceable resources!
