Title:

Comments: Please leave the Green Mountain National Forest as a Climate Forest Reserve. Logging Telephone Gap will make it harder for the North East to achieve the 30 by 30 goal (protecting 30% of our forests by 2030) and will irreparably set back the ecosystems in the area. Undisturbed it will be better carbon buffer and will provide better recreational opportunities for an area that depends on tourists and mountain recreation for its economic livelihood. Thank you.
