Title:

Comments: I am writing on behalf of the environment, wildlife, wetlands and future generations in relationship to the telephone gap project in the making

It is important to realize the impact this project will have on the environment, in which we are well aware of the devastating results of poor human decisions. Removing life-giving trees will affect air, water, soil, wildlife and the necessary life cycles that keep our world sustainable and provide a healthy future for our children's children, unto 7 generations.

To make such choices of removing trees and affecting the natural cycles that are beneficial, is fully irresponsible.

I oppose this project and ask you reconsider such a poor decision that brings no benefit to the "whole", the "commons", the community and future generations.

Thank you
