Comments: I am in favor of this project. I think it is a comprehensive and well thought out project. Please do not be dissuaded by the carbon sequesters or other radical environmental groups. Conservation not preservation should be the order of the day. Plenty of the National Forest is already in the preservation bucket and is off limits to any multiple use concept. Let the carbon sequestration take place in the Wilderness. Roadless, and areas along the long

Trail.

My only suggestion is to keep roads in this project open to hiking and vehicles where possible. As I age I find in many cases my only access to the forest is by vehicle or walking a good road.

Thank you for considering my comments
