Title:

Comments: The proposed project to log mostly old and mature trees to favor younger trees is wrong minded in the face of climate change. It should be stopped.

The project should be stopped until it can demonstrate compliance with President Biden's 2022 Executive Order to protect mature and old forests.

The GMNF staff should work cooperatively with community groups (such as [SavePublicForests.org](https://www.savepublicforests.org) of which I am a member) to develop a "climate-smart" alternative that permanently protects most of the old forests on the public land in carbon reserves (while getting needed timber sustainably harvested from younger trees on private lands). Such climate-smart forestry should become a national model
