Comments: On Earth Day last year, President Biden started an important process to protect mature and old-growth forests on federal lands. The President rightfully recognized the incomparable value of public lands as a nature-based solution to climate change, along with the other benefits they provide for wildlife habitat, clean drinking water, outdoor recreation and tourism, cultural and historic values, and much more.

Mature and old-growth forests contribute to large-scale conservation targets in the conterminous United States??????. <https://www.frontiersin.org/articles/10.3389/ffgc.2022.979528/full>

Telephone Gap logging has to be stopped. Respect wildlife, respect biodiversity, respect mature and old-growth trees. This project does not make sense in any way. We have to look to the future of our planet for the next generations which means SAVE OUR TREES!!
