Comments: Dear People of the Forest Service"

I beg you to STOP THIS ACTION OF LOGGING in the Green Mountain Forest of old forest mature trees and so many 1000's of necessary trees for climate cooling and water resources protection in the state of Vermont.

We have this life time opportunity to protect our resources and well being...please are you not paying attention to the scientific havoc and hardship that is climate change and how major tree destruction it will affect everything that we hold dear in Vermont... our children our land our resources, our fellow birds and animals and fish and importantly our breath....

The Green Mountain Forests are a jewel of ecology and environment .... not wise to destroy!!!

I love being in the Green Mountain Forest.... it is a spiritual experience.

thank you . Kathleen Houlahan

PLEASE USE YOUR WISDOM
