Title:

Comments: I am a Vermonter who loves our forests and who has a deep passion for science and conservation. I have spent many hours hiking, birding, and observing countless species of plants and animals in the Green Mountain National Forest. I think this project is not balanced enough in favor of the animals who call the GMNF home, nor the climate concerns of current and future Vermonters. I implore you to cancel this project and keep this land wild. I and many other Vermonters do not support this project.
