Comments: Dear Powers that be,

It is a dismal idea to destroy an old growth forest. What I don't see in this proposed shear cutting is what the wood is designated for. It does not sound like forest management, where is the wood going?

One thought Senator Sanders, Balint, and Welch.

Let's VOTE.

On a given date we vote on the project. Everyone interested casts a ballot. Our local states people are supposed to represent "we the people" more often then not it seems larger forces are at play and people do not truly have a voice.

Consider the carbon sequestering old growth trees provides. Consider the complexity of life in the forest that will be disrupted and how slowly life will return.

Let's vote.

Let's exercise democracy for this disruptive measure of clear cutting our pristine forest.

In Monkton,

Cassandra Corcoran
