Comments: Please move forward as originally planned. These projects are long in coming and the forest and the forestry economy need this to happen. Some of these lands have been under the ownership of the federal government for decades and it's about time some trees get cut.

You have the opportunity to demonstrate good forestry management at a landscape scale. We professional foresters would benefit from the knowledge we can ascertain from these timber sales.

Our loggers, mills and other wood users will also benefit.

Thank you for the opportunity to comment.
