Comments: Do not log in the Telephone Gap forest area. The pursuit of profit is destroying our habitable climate and world. While the richest of the rich may be able to shield themselves for the longest, everyone will feel the effects eventually. Felling old forests that can capture the most carbon is extremely detrimental to life on this planet, and if you proceed with this project you put yourselves, this country, and the entire world further at risk of climate and societal collapse.

As a citizen of these United States, a human on this planet, and a mother who wants her child and all children to have a chance in the future, I demand that you cease this reckless, heinous act in the Telephone Gap area of the Green Mountain National Forest, lest the U.S. Forest Service be remembered as a harbinger of destruction, and an enemy of the people of this planet.
