Comments: Vermont is a beautiful state; it's is green and full of gorgeous forests. Those forests help us have clean air, healthy ecosystems, protection from many of the crises other states are enduring. Wonderful animals love our forests too,,,and we need to protect the homes of our animal friends. We should be proud of protecting our trees, not killing them and eliminating them. DO NOT kill our trees. If you do, our wonderful state will be weak and ruined, as other states are now enduring from Heat and lack of safe water and dying animals and plants.killing trees is just as bad as killing people.
