Title:

Comments: I am writing in defense of the forest and all of the animals that depend on the ecosystem for their lives including the human population. I am very strongly opposed to the proposed cutting in the Telephone Gap. It is unfair to give precedence to the voices of those who stand to profit financially from this project! Especially considering the conflict of interest involved in the Forest Service receiving financial support from these entities. We the people should have an equal say and considering the overwhelming response in opposition, this project should be immediately halted.
