Title:

Comments: I am very much opposed to the Telephone Gap Resource Project #60912, as it is a clear cut project, which goes against nearly all of the research. The research, which in this case was done in 2006 -- was too long ago to remain valid. The research since 2006 shows that clear-cutting will release WAY more carbon into the atmosphere than selective cutting.

I personally would rather see NO clear cutting in this particular case. In this case there is old-growth forest involved. I am wholeheartedly against clear-cutting of old-growth forest.
