Title:

Comments: I own 4.8 acres of land surrounded by the Green Mountain national Forest. My view to the south is of the Middlebury Snow Bowl across many acres of what was formerly the Battell Wilderness. I love my land and love the forest. I am unhappy with the logging that was done on Duclos Road about four years ago. The terrain is desolate. I also am concerned about climate change and wish that this Telephone Gap Project would give greater consideration to the carbon sequestration potential in old growth trees.
