Title:

Comments: As a long-time benefactor of Forest Service lands, my gratitude for your work. However, I must oppose the large scale harvest of trees you propose, presumably for financial reasons, and ask that you find alternatives. Our priorities must change in the light of climate change. It's impact has become undeniable. We dare not ignore predictions of the grim future ahead if we do nothing. We dare not ignore the important role of our forests in stemming the tide. I appeal to your foresight, before willful ignorance becomes the regret of hindsight.
