Title:

Comments: Thank you for the opportunity to comment on this project as a member of the public. I hope to one day be a Vermont resident. While many interests must be taken into consideration and balanced when a project proposal is put together, sometimes taking no action is a better route to the future. Mature and old growth forests should remain as they are in order to sequester carbon.

For the sake of present and future Vermonters and fellow Americans, please protect our forests and public lands and do not open Telephone Gap up for logging leases.
