Comments: Dear Forest Service,

I am writing to ask that you not open up the Green Mountain Forest's old growth to logging. The current proposal would grant logging access to 10,000 acres where 85% of trees are likely to be more than 80 years old and 55% older than 100. We need these old growth forests because they contain carbon. We absolutely must not allow clearcutting either.

Thank you.
