Title:

Comments: I am writing to encourage you not to log the Telephone Gap Area. There are fewer and fewer large areas of forests that have been growing like this one and leaving it will be in the best interests of the climate and give much enjoyment to people who will use the Forest. Also there are established populations of animals, and plant communities who have been residing on this property and they will be decimated if the land is changed by this logging.

Thank you for considering stopping the logging and I commend you for that.

Susan Musty
