Title:

Comments: After hearing about this project 2 days ago, I realize I cannot become well enough informed to fully comment on the entirety of the plan. It is my hope that a management plan from 2006 will be/has been scrutinized through the current lens of climate change and the fact that President Biden has stressed the importance of saving old forest and keeping the carbon in place. As the chair of a VT town Conservation Commission I understand the work that goes into both creating and implementing management plans as time marches on. Thanks for the opportunity to comment,

Virginia Haviland
