Comments: Please reconsider the decision to permit intensive logging in Telephone Gap, part of the Green Mountain National Forest. I am a resident of Addison County, and enjoy the nearby forests and waterways. I am concerned that this extensive project threatens such a large portion of the roadless area of this parcel, and thus threatens one of the largest wildlands and wildlife corridors. Another byproduct of the logging venture could be degrading the headwaters of several waterways, including the Otter Creek.

Please also consider the environmental importance of old growth and mature forests, which absorb and store a substantial amount of carbon.

Thanks for getting comments from and listening to the community most affected by this logging project.
